

Eternal Words – The Least to the Greatest – Part II

Our Solar System

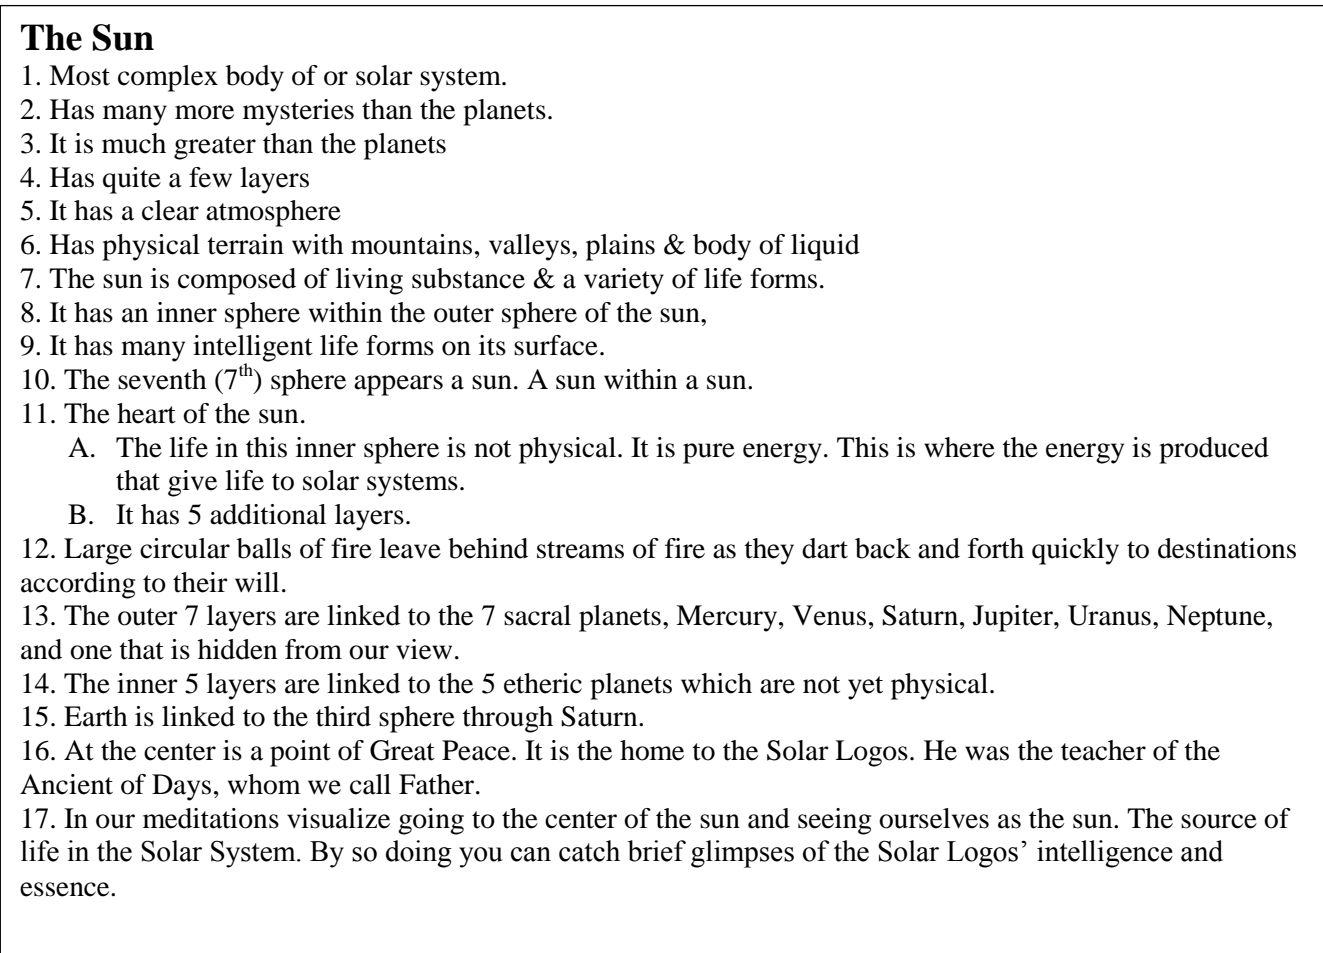

The Planet Venus

1. Venus
2. The clouds that surround the planet.
3. Balls of Energy
 - A. Very happy, playful, & appeared to be dancing.
 - B. They seemed happy to recognize the visitors.
 - C. The exchange of energy was stimulating
 - D. Energy excitement like that of a dog
 - E. These lives are of animal like consciousness
 - F. Animals come to frolic after tough life on earth.
4. Surface of Venus
 - A. Great cities, looking ancient, but from the far future – Only seen in different dimension.

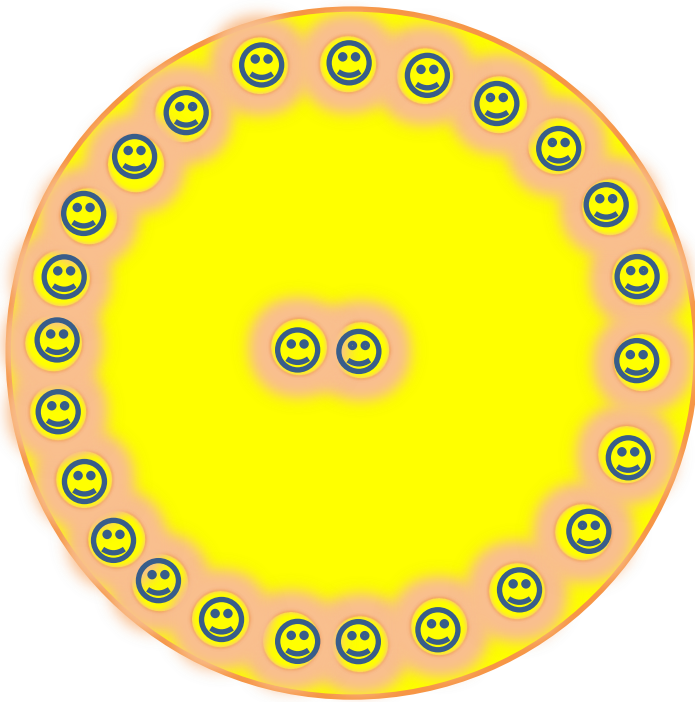

Our Solar System

1. There are three planes of existence, almost 7 fold x 7 fold beyond our physical plane of existence.
2. There are planets in our solar system that are not seen that are of a more refined matter.
3. One of these planets is the same size as earth, in a similar orbit, with bounteous life.
4. There are five (5) major planets like this one described in No. 3 that are in various orbits around the sun.
5. There are a total of 70 planets in our solar system.

- B. Buildings about 2 miles in height with the appearance of fine crystal, making a multifold effect of futuristic, beautiful shapes.
- C. Buildings are living things that are grown & formed by hand of an artist.

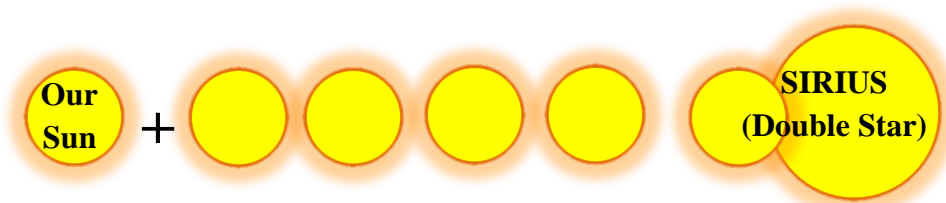

Merging Ceremony

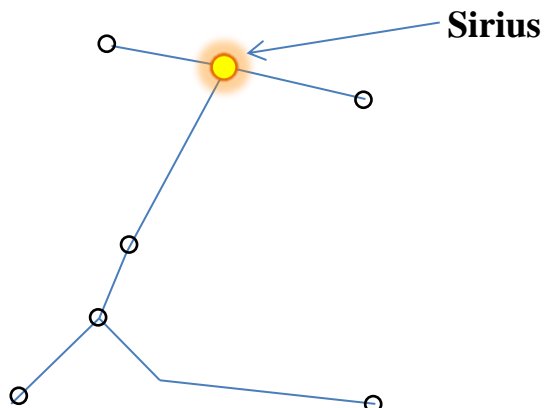

1. There are 24 entities joined in a circle w trails of fiery light joining them – a version of our holding hands.
2. Two beings in the center – close to each other.
 - A. The two beings are merged.
 - B. Merged into 1 fiery cell
 - C. Electrical energy engulfs the two joined entities.
 - D. Electrical energy energizes the ones in the circle
 - E. There is a merging on several levels.
 - I. A spiritual explosion
 - II. Upon merging the can explore the past of the individual, their joys, their defeats, their successes.
 - III. Upon merging it is as if you are the individual.
3. You experience their struggles against ignorance, unjust authority, betrayal, successes in bringing many people into the light.
4. All experience, good and bad, will be leveraged for good in the end, when all souls merge and share in a higher sphere.
5. These entities had progressed beyond the need to incarnate.
6. In their current form, they perform various acts of service and seek progression on a higher path unknown to humans.
7. Make use of all the experiences of their co-workers through merge meetings.
8. Can merge with other entities and then draw from their past experiences.
9. They then can partake from bad as well as good, without having to suffer pain or misery.
10. It is like watching a movie without having to go through the experience.

Brotherhood of Solar Systems

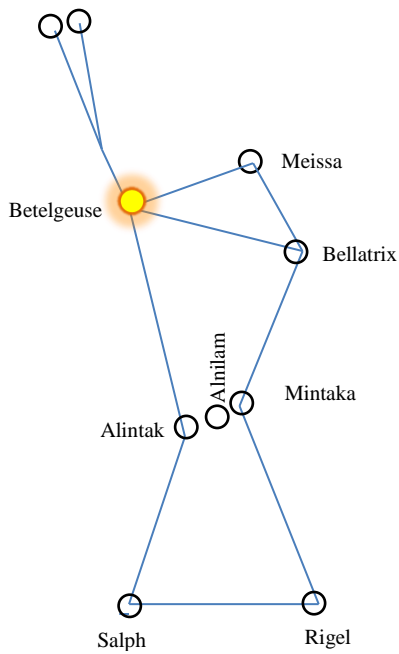

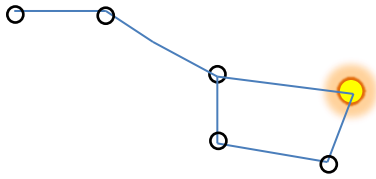

1. Our sun & solar system are a part of a brotherhood of seven (7) suns with their respective solar systems.
2. There is a vibration that emanates from the whole, the seven systems together.
3. Sirius is the lead star of the seven brothers. It is a double star.
4. There are two governing Logos in the two star configuration of Sirius
 - A. It has a Solar Logos that governs his solar system the same as our solar system.
 - B. The second Logos governs all seven (7) solar systems.
 - I. His consciousness is above the understanding of the Ancient of Days.
 - II. He is called the “One about whom naught can be said”
 - III. His language and means of communication are beyond words as we know them.
 - IV. Anything we say using communication that can be said or placed in words is useless to Him.
 - V. Our Solar Logos understands His methods of communication
 - C. The names of the other 5 solar systems are not given.
 - D. The seven constellations have seven (7) prominent stars each. Most have more than seven (7), but seven (7) major ones.

Sirius Constellation

Another Cluster of Solar Systems

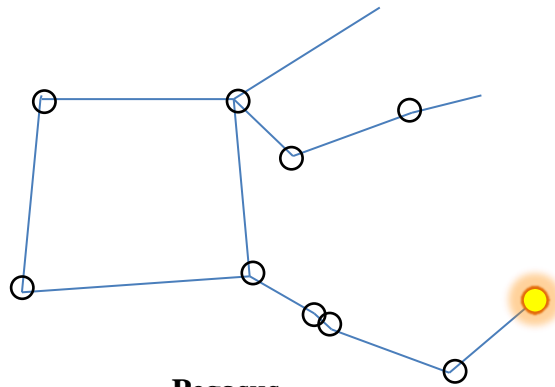

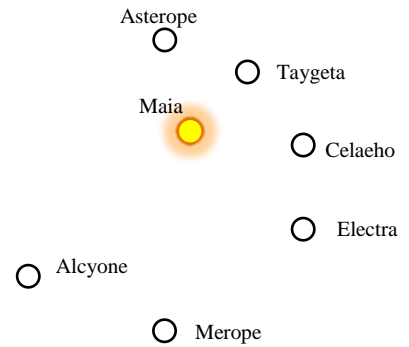

The Big Dipper or Ursa Major

Orion

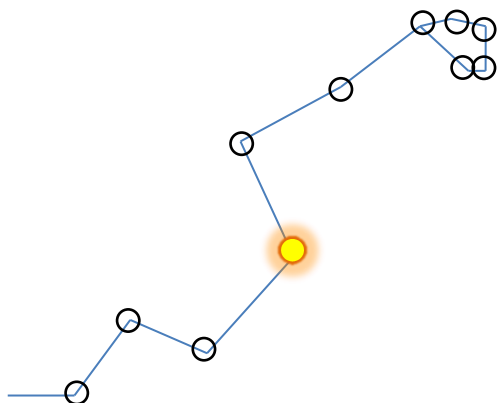

(The Great Star is Betelgeuse - The Logos of Orion is in close communication with ours at this time.)

Pleiades – The 7 Great Ones (7 Sisters)

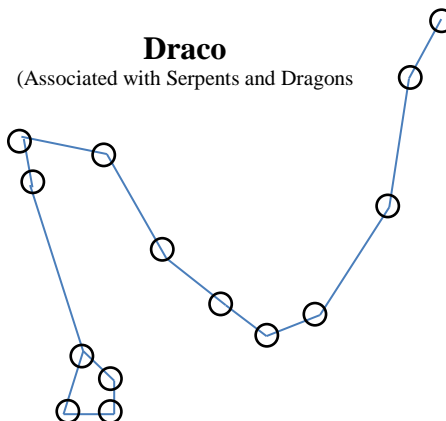

Pegasus

Hydra
(The Water Snake)

Draco
(Associated with Serpents and Dragons)

These seven constellations form the body of another Logos of even greater evolution and has a consciousness so high that all we can hope for is to feel His influence.

Truths Learned

1. In every major body whether a planet, a star system or a group of systems, there are two life forces at work.
 - A. One is the indwelling entity which is awakening in consciousness
 - B. One is an entity who has already attained a high state of consciousness – This is one who has passed through the human kingdom.
2. Our ancient of Days is called the Planetary Logos with part of His purpose is to stimulate the indwelling consciousness of the Great Being whose physical body is the planet.
3. Right now he is on the verge of obtaining self-consciousness, corresponding to a seven year old child in the human kingdom.
4. The planet Venus of our solar system, its consciousness corresponds to a 21 year old and the indwelling entity is self-conscious.
5. Even the Solar Logos of our Sun is more advanced than the Ancient of Days, the indwelling entity consciousness of the sun is younger than the earth. It corresponds to an age of a 6 year old child.
6. As we ascend to the higher Logos, the indwelling entities are less developed or more elementary in their consciousness.
7. The guiding Logos, who evolved from the human kingdom, becomes greater as we go up, but the indwelling consciousness becomes less.
8. When the great entities mature, their consciousness will soar beyond imagination. The only way we will be able to keep up with them when this happens is to blend our consciousness with them. This is the order of greater things.
9. The lesser assist the greater and then the greater takes the lesser forward in his coat tails.
10. As we ascend to the greater bodies we find the highest form governed by a single solar Logos is seven (7) constellations. There is no single Logos over the Galaxy. But there are various groups of great beings who seek to guide the Galaxy as a whole. There will eventually be a single Logos, but billions of years in the future.

11. The consciousness of the indwelling entity must evolve and a Logos must also evolve who can handle such a great life.

12. Galaxies are grouped together – not scattered.

A. Some in small groups, others fairly large

B. Parts of space are fairly dense with galaxies. There are other parts that are almost void.

13. The creative mind of God works from below, going upwards, from the small to great.

14. In past eternities, relative perfection and great organization has been achieved in the subatomic worlds.

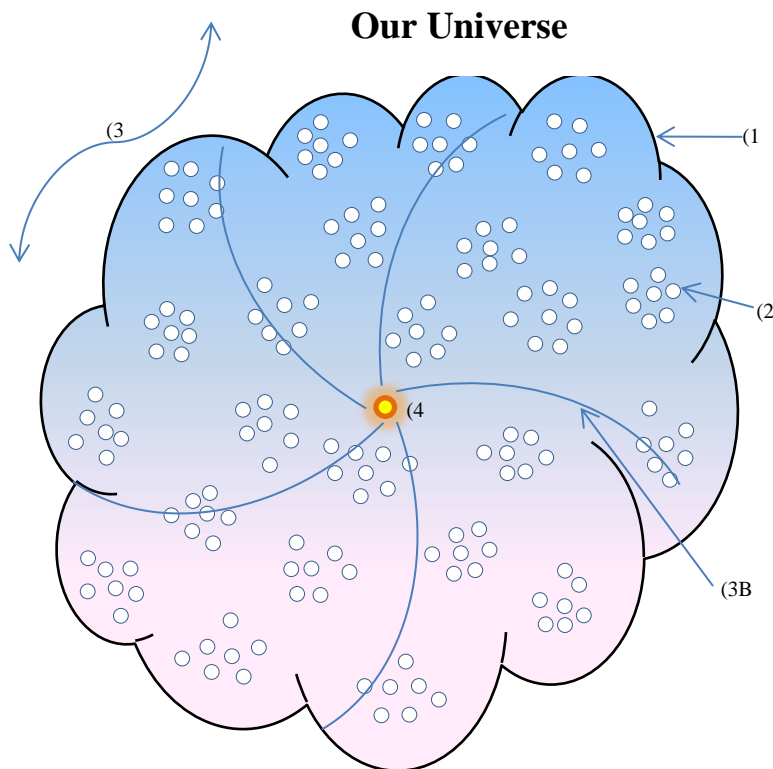

When a level is perfected, it then continues as if run by a great computer program.

A. Then consciousness moves a step up to the next level and creates at that next level.

B. Presently the central point of God's consciousness in the physical is focused on beings of human intelligence, scattered throughout the universe, causing humans to be the soul of the universe, the bridge between spirit and matter. Humanity is the focus.

C. Great responsibility lies on the humans.

D. The One Life, which is God, is projecting itself through us His representatives. Advanced humanoids are often called Gods

9. The feeling of aloneness takes hold of every living thing at one time or another.

A. This is particularly evident with the beginning disciple as he struggles with higher development.

B. It will seem he is alone and there is no one else going through what he is – This is called the dark night of the soul.

10. The entity that was in the point (universe of 11) is the same entity that is incarnated into the body of the universe

1. Massive cloud of tiny points of light

2. Tiny points of light are galaxies far removed.

3. In front is nothing but blackness

A. Shape of the universe does not have much definition.

B. It looks like a great cloud just beginning to take spiral formation.

4. The core – the alpha center

A. A feeling of fear and trembling

B. It feels completely alone

C. Has sent out its thought & feelings into the great void and nothing has returned back yet.

D. Fears being alone for the eternities

E. Does not know if there are other universes. Not only is He alone, but fears being alone forever.

5. There are more universes than we can imagine.

6. Our universe is about 40 billion light years across.

7. The nearest universe is approximately 1.2×10^9 billion light years away.

8. It would take much longer than the life span of the universe to get here from another universe.

Truths Learned

1. When we are born anew, we are released from all attachment to memory and begin anew. Our intelligence is in the child, but with limitations that had that intelligence.
2. When the universe of eleven (11) was perfected, the one entity multiplied itself in the fabric of space. The entity in the universe of eleven (11) is the same entity you would encounter in any of those points. This entity is the One God in the universe. It is asleep in the universe past, and is awakening in the universe present.
3. The One God is incarnated into the entire universe.
4. It is a good thing that there are higher lives like the Ancient of Days and the other Masters who can assist the lower kingdoms until the One God matures in His present incarnation.
5. Express appreciation from the core of your being.
6. Currently the consciousness of our universe corresponds to a five (5) year old child.
7. The universe is about half way through its evolution.
 - A. It has spent much of its life evolving through mineral, vegetable, animal and other type of consciousness lower than humans to get to where he is now.
 - B. His sacrifice is great.
 - C. Descended to such a great depth so that all of us could ascend higher.

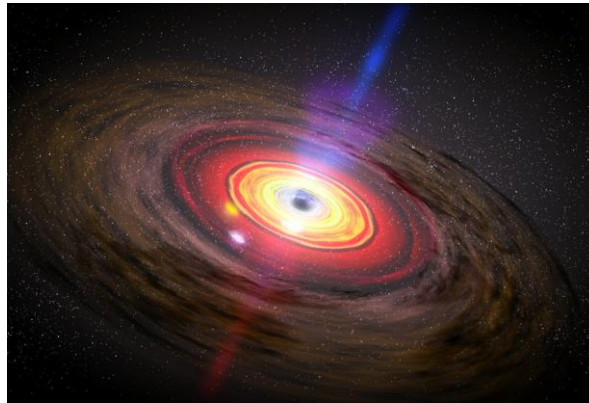

Events when the One Central Life Matures

1. The universe will begin to spin more quickly.
2. As it rotates it will gain definition
3. First it will become fairly flat, surrounded by rings, something like Saturn.

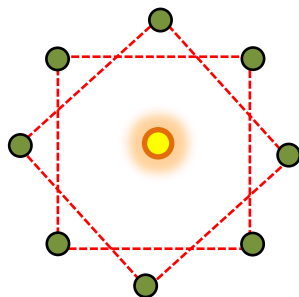

4. It will undergo a great change.
 - A. The number 7 will manifest
 - B. The center will be a disc of light surrounded by 7 beautiful rings, with colors of the rainbow that dance in various orbits.
5. It will have full self-consciousness & intelligence greater than the sum of its parts.
6. Over many billions of years it will go from an elementary consciousness and form, to the sublime.
7. It will then be the all-powerful benevolent God, which the children within have always dreamed.
8. The One Central God will discover it is not alone.
 - A. He will discover that He has many friends.
 - B. Our universe is in proximity of six (6) other universes, similar, but with unique designs, making a total of seven (7) when our universe is counted.
 - C. These seven (7) had an association beyond our current understanding.
 - D. The universe is no longer alone and will receive great joy through communion with like others.
9. Our universe will interplay with the group of six (6) other universes first, and then with other clusters of universes.

10. The universes will begin to lose their energy, and at the center of our universe a black hole forms.
11. The black hole devours our universe and all others in view & they will become no more.

12. Creation is never lost. The Alpha Point endures.
13. The universe will be re-born, another explosion of creation will take place (The Big Bang)
14. The universes of three (3), four (4), five (5), six (6) and finally seven (7) like our current universe will come into manifestation.
15. The universe of seven (7) evolves and takes shape again, with the shape and consciousness being slightly different.
16. Each will reach maturity again, and obtain a greater beauty than before.
17. The universe will die and be re-born several hundred times.
18. Each time it will mature and be more beautiful than before.
19. Finally a degree of perfection will be reached that there is no purpose in dying and being re-born and all the universes remained without disintegration.
20. Nothing further is to be accomplished in the universe of seven (7).
21. Next they must build on the universe of eight (8).
22. Our universe will gather with other universes and gather into great groups and create a great atom based on the principal of eight (8).

23. These universes will create a greater world and then a greater universe.
24. We will go to sleep in the universe of seven (7) and seek to be re-born in the universe of eight (8).
25. Our re-birth will be into a group life that we will share, and will again resume the struggles to achieve, to learn, to create on a scale that we can only guess.
26. We will die and be reborn many times.
27. We will then progress to the universe of nine (9), ten (10), eleven (11), and finally twelve (12) where the perfect circle of creation will be manifest.
28. All things will be gathered in one.
29. Another great decision will be made.
30. This is the creation on the physical plane. There are higher grades of matter and spirit which use different creative processes.

Serpent / Human Evolution

1. The universe contains every imaginable life form which you can conceive.

2. As life progresses from lesser to greater, there are many struggles for dominance, survival of the fittest.
3. Survival of the fittest prevails until we arrive at the stage where intelligent, upright figures begin to manifest.
4. Eventually, a plethora of forms, competing for domination as self-conscious units, manifest on the various worlds.
5. A number of variations appear and disappear, but almost always comes down to competition between 2 forms, serpent and human mammal.

- A. The serpent form at first will have complete domination until the highest of humanity reaches a point of "soul contact"
- B. A fierce competition ensues.
- C. This eventually results in complete destruction of one race or the other. It does not occur all in one moment, but over many thousands of years, sometimes millions.
- D. During the transition period, one race will be completely exterminated, but then survives to eventually flourish and almost exterminate the other race. The war goes back and forth until one race dominates extinction of the other.
- E. The human race is more spiritually sensitive, they are victors 90% of the time.
- F. Where serpents dominate, they will physically kill all the humans.
- G. Where humans dominate, they are forced to fight to defend themselves, but reach a point on a spiritual level where the life of the planet comes to their defense and eliminates the serpent race. Because of spiritual progression, they have earned the right to dominate unless:

- I. They revert to the lower serpent consciousness and lose their rightful place.
- II. The serpent race is re-born, and in their fierceness, they completely and cruelly eliminate the human race.
- III. Serpents complete their purpose and evolution about the time that humans reach spiritual domination.
 - A. When it is time to go, those who were serpents are reborn into the human race.
 - B. Most adapt and move on.
 - C. Others tap into ancient memories and work with the Dark Brotherhood in a spiritual conspiracy with the goal of complete elimination of the human race and re-establishment of the serpent race.
 - D. This is the situation on earth right now.
 - E. Hitler's extermination and dominance would have led to total domination by the dark brothers and their Masters, the serpents.

JST, Revelations 12:8

8 Neither was there place found in heaven for the great dragon, who was cast out; that old serpent called the devil, and also called Satan, which deceiveth the whole world; he was cast out into the earth; and his angels were cast out with him.

- IV. Among all creations there are a few failures.
- V. There are three (3) planets in the Draco system where serpents dominate.
- VI. This is a description of this reptilian race:
 - a) Stand erect
 - b) No tail
 - c) Very leathery hard skin
 - d) Lizard eyes
 - e) Leaders are large and more powerful, height is 10 – 12 feet tall
 - f) They have to prove their sexual virility
 - g) Rule with a stern hand and no pity
 - h) No modern technology
 - i) Their full attention is on self.
